## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

- 1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
  - A person shall be entitled to a patent unless -
  - (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipate by (ANH, Y J Derwent #2002-563438).

As per claim 1, Anh shows a PDP display (In Novelty paragraph) and a pair of sustain electrodes formed at a peripheral portion of an upper substrate (In fig.1 and In Detailed as element 5 and 8) and a trigger electrode formed at the center of the upper substrate (element 30).

3. Claims 2-8 are rejected under 102(e) as being anticipated by (Kim, J S Derwent # 2002-704158).

As per claim 2, Kim shows supplying a scan pulse to the trigger electrodes formed at the center of an upper substrate during the reset period and supplying a scan pulse to the trigger electrode during the address period and supplying a data pulse synchronized with the scan pulse to an address electrode formed on a lower substrate opposing the upper substrate during the address period; alternately applying a sustain pulse to a pair of sustain electrodes formed at a peripheral portion of the upper

Application/Control Number: 09/996,714

Art Unit: 2673

substrate during the sustain period and applying a trigger pulse to the trigger electrodes during the sustain period(In Detailed description paragraph and In Fig.1).

As per claim 3, Kim shows applying a DC voltage to address electrode (same paragraph).

As per claims 4-8, Kim shows frequency of the trigger pulse has a n times than the sustain pulse and higher than the sustain pulse and a lower than sustain period (in Fig.1).

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nitin Patel whose telephone number is 703-308-7024. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin H Shalwala can be reached on 703-305-4938. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-9618.
